

Company Information:

Landmark Logistics Corporation is a locally owned and operated freight forwarding company.

Landmark's **Mission** is to:

Provide logistics solutions to Hawaii based businesses in an efficient, timely and cost-effective manner by developing relationships, strategic partnerships and utilizing state-of-the-art technology.

Landmark's **Vision** is to:

Be the premier freight forwarding company in Hawaii where our clients love to do business with us, not because of our REASONABLE rates; but due to our OUTSTANDING service, COMMITMENT to YOU, and our ADDED VALUE.

Our Core Values are:

- Trust and Respect
- Reliability
- Efficiency
- Safety

Services Offered:

- **LCL/LTL** – Also known as Less Than Container Load, Landmark can consolidate your freight into one of our pre-booked containers and ship it to Hawaii for delivery or will-call. Due to our strategic partnerships throughout the US Mainland, we can provide door-to-door service for a shipment as small as a pallet.
- **FCL** – Also known as Full Container Load, Landmark can truck your pre-packed container from anywhere in the US Mainland to Hawaii and handle all of the logistics for you.
- **Cube Utilization** – Need to maximize your own container? Landmark can build your containers for you at our LA facility and ship your container directly to you once the container has been maximized (per your specifications). Simply route your product to our LA facility and we will build your containers for you!
- **Warehousing** – Short term or long term, Landmark can store your pallets until they need to be delivered or will-called.

Added Value:

- Partnership with sister company, Courier Corporation of Hawaii (CCH). CCH will provide the "last-mile" trucking and be able to provide efficient and timely delivery of your LTL or FCL shipments Statewide. CCH never closes!
- Technology. Landmark has invested tens of thousands of dollars on a custom software platform specific for our company and our industry. What that means for you, bottom line, is a more streamlined, efficient operation.
